

Radon Test Kit Instructions

- 12 hours prior to testing, all exterior doors and windows must be closed except for normal entry and exit. These closed house conditions must continue until testing is completed. (12 hours prior to and during the 3 to 7 day test.)

- Operate heating and cooling systems normally. Do not place it below or near a ceiling fan that you plan to operate or near an air vent.
- Check the weather news before testing. Do not conduct test during unusually severe storms or high winds.
- Place the Radon test kit in the lowest lived in level of your home in a room regularly used (living room, bedroom, play-room.) Do not place in kitchen, laundry room, garage, closet or bathroom.
- Place test kit where it will not be disturbed, away from any drafts caused by heating, ventilating air conditioning, and away from areas of high humidity.

		WARNING: ANALYSIS CANNOT BE FINALIZED IF ANY INFORMATION IS MISSING AND THERE WILL BE		

- Open the bottom of the test kit and insert foam filter in the packet's "squared opening." Using a water-proof pen (no pencil), circle the starting hour and day of month on the kit. Hang it 6 ft. to 8 ft. above the floor near the center of the room.
- After 3 to 7 days (maximum), discard the foam filter, remove white tape, seal the test kit, print name, address, circle the ending hour and day of month, answer the questions at bottom of kit, and mail to specified lab on package right away for analysis. Results should be received in a week to 10 days.

If you have any questions about Radon or test kit instructions, please call 1-800-ASKUGA1 or visit our web site at www.fcs.uga.edu/housing/radon.
