The Cause: Radon
Radon is a colorless, odorless, and tasteless gas that can kill. The Surgeon General lists it as the second leading cause of lung cancer in the United States. The radioactive element moves through the ground to the surface, and can easily enter homes and buildings. There is no way to detect the amount of radon present unless it is tested.

The Goal: Raise Awareness
Harmful effects of elevated levels of indoor radon gas are a problem. The solution is to reduce the number of homes with elevated levels of radon. This contest is designed to raise awareness for radon testing and inform people of the danger of radon in their homes.

The Participation: Far-Reaching
Students from all over the state are encouraged to participate in the contest. Judges will select winners and runners-up, and the 1st place entry will be entered into the national contest.

Poster Topics:
Choose from the following five topics:
1. What is radon?
2. Where does radon come from?
3. How does radon get into our home?
4. Radon can cause lung cancer.
5. Test your home for radon

Contest Calendar
- Submit entries to UGA Radon program by **September 30, 2015**
- Judging will occur by **mid-October 2015**
- State winners notified by **November 2015**
- National winners notified by **mid-December 2015**
