

# HOME SAFETY

## CHECKLIST

### FALLS ARE THE LEADING

cause of injury and injury death for people 65 and older. Trips and falls may be caused by a number of potential hazards, including

clutter, rugs, furniture, and extension cords. You can reduce the risk of falling by conducting a simple home assessment. Use this checklist to identify possible safety problems in your home and then take action to fix the problems. Start by going room to room, and place a mark in the appropriate box. When done, go back over the checklist and identify three things you can do to make your home safer. List those items in the bottom section of the checklist and take action to create a healthier and safer home. Continue to work on improving the safety of all areas of your home. The goal is for there to be no marks in the “no” column of the checklist.

UNIVERSITY OF GEORGIA  
EXTENSION

## STAIRWAYS & PORCHES

	Yes	No	N/A
Are the stairs well lighted?			
Do all indoor stairways have light switches at the top and bottom?			
Are there sturdy handrails for all steps and stairways?			
Are the steps and stairs in good condition?			
Are there sturdy guard rails on all porches and decks?			
Are porch area(s) in good condition?			
Are the stairways a non-slippery surface?			

# LIVING ROOM & FAMILY AREAS

	Yes	No	N/A
Are the floors a non-slippery surface?			
Do all throw rugs have non-skid backing?			
Are carpets firmly attached to the floor?			
Is the furniture in good repair and safe to use?			
Are the traffic areas free from all cords (electrical, cable, etc.)?			
Are hallways free from clutter?			
Are hallways well lighted?			
Does the room have lighting that doesn't produce glare?			
Is there a screen in front of the fireplace?			
Are electric/gas space heaters at least 3 feet away from curtains, furniture, and other combustible objects?			
Are electric/gas space heaters placed on non-flammable surfaces and out of traffic paths?			
Are electric and gas space heaters placed where they can't easily fall over?			
Are gas space heaters properly vented?			

# KITCHEN AREA

	Yes	No	N/A
Are traffic areas free from all cords? (extension, phone)			
Is there good lighting in the work areas? (sink, stove)			
Are frequently used items stored in/on an “easy to reach” place?			
Is a step stool or small ladder used to reach high shelves?
