CONCEPT

"Quercus Virginiana"

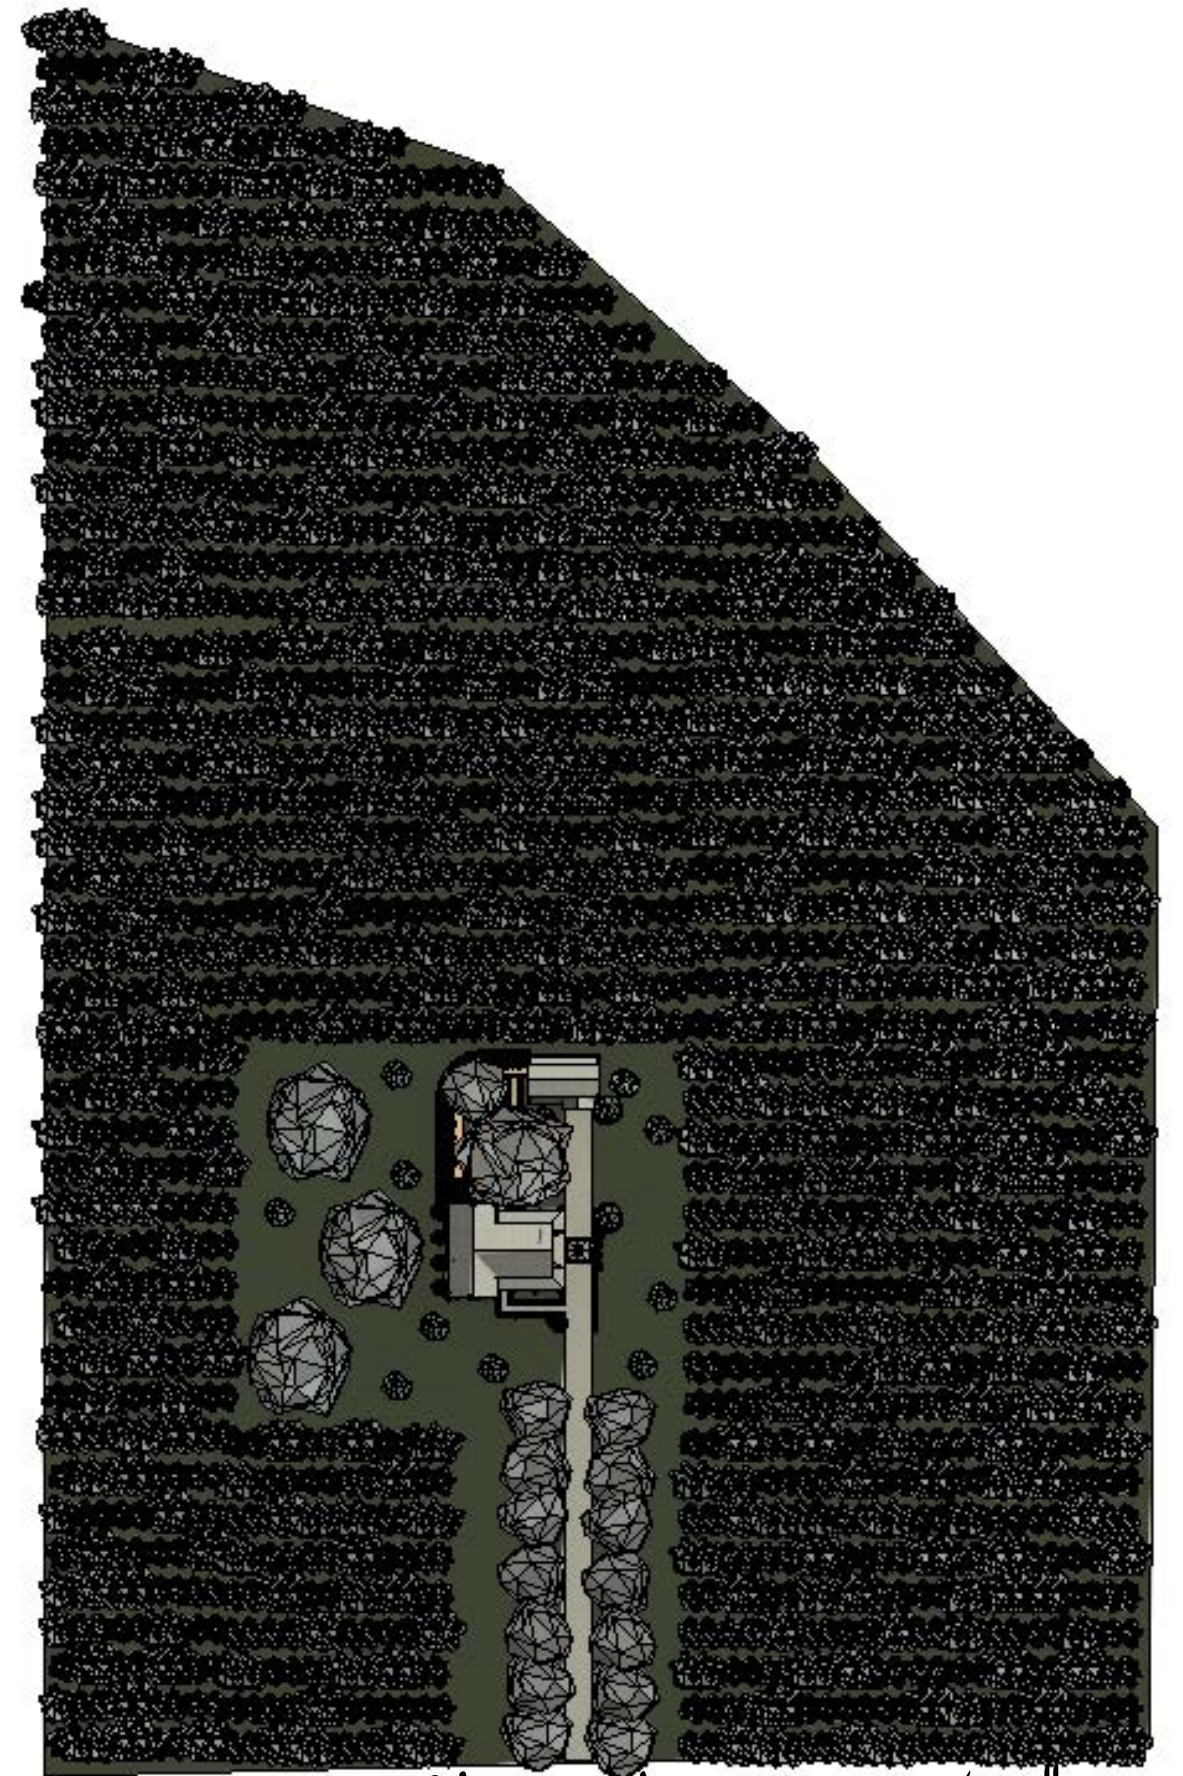

"Quercus Virginiana" or the "Live Oak" is a massive and expressive species of oak tree that is known for its far-reaching and twisting limbs. The Live Oak is the state tree of Georgia and the focal point of the Palmer Residence. The Palmer Residence is an English Tudor-inspired south Georgia country home located on a family farm in Warthen, Ga. The home will emphasize independence and sustainability. The design of the home will be based on being self-sufficient, utilizing landscape and energy-efficient technologies, as well as material health. Material health indicates that the materials used in construction and furnishing are natural and when they reach the end of their lifespan, they can either be reused or would naturally decompose. The home will provide plenty of space for the family and guests and be designed so that the studio and bath on the main floor can be turned into a primary suite to be more accessible as the hosts age. The home is meant to grow with the family and provide a safe and sustainable sanctuary away from the hustle and bustle of everyday life.

SITE PLAN

8132 S Sparta Rd. Warthen, GA. 30194

Site Plan: 0'-1/4"=1'-0"

1ST FLOOR

Sustainable specs:

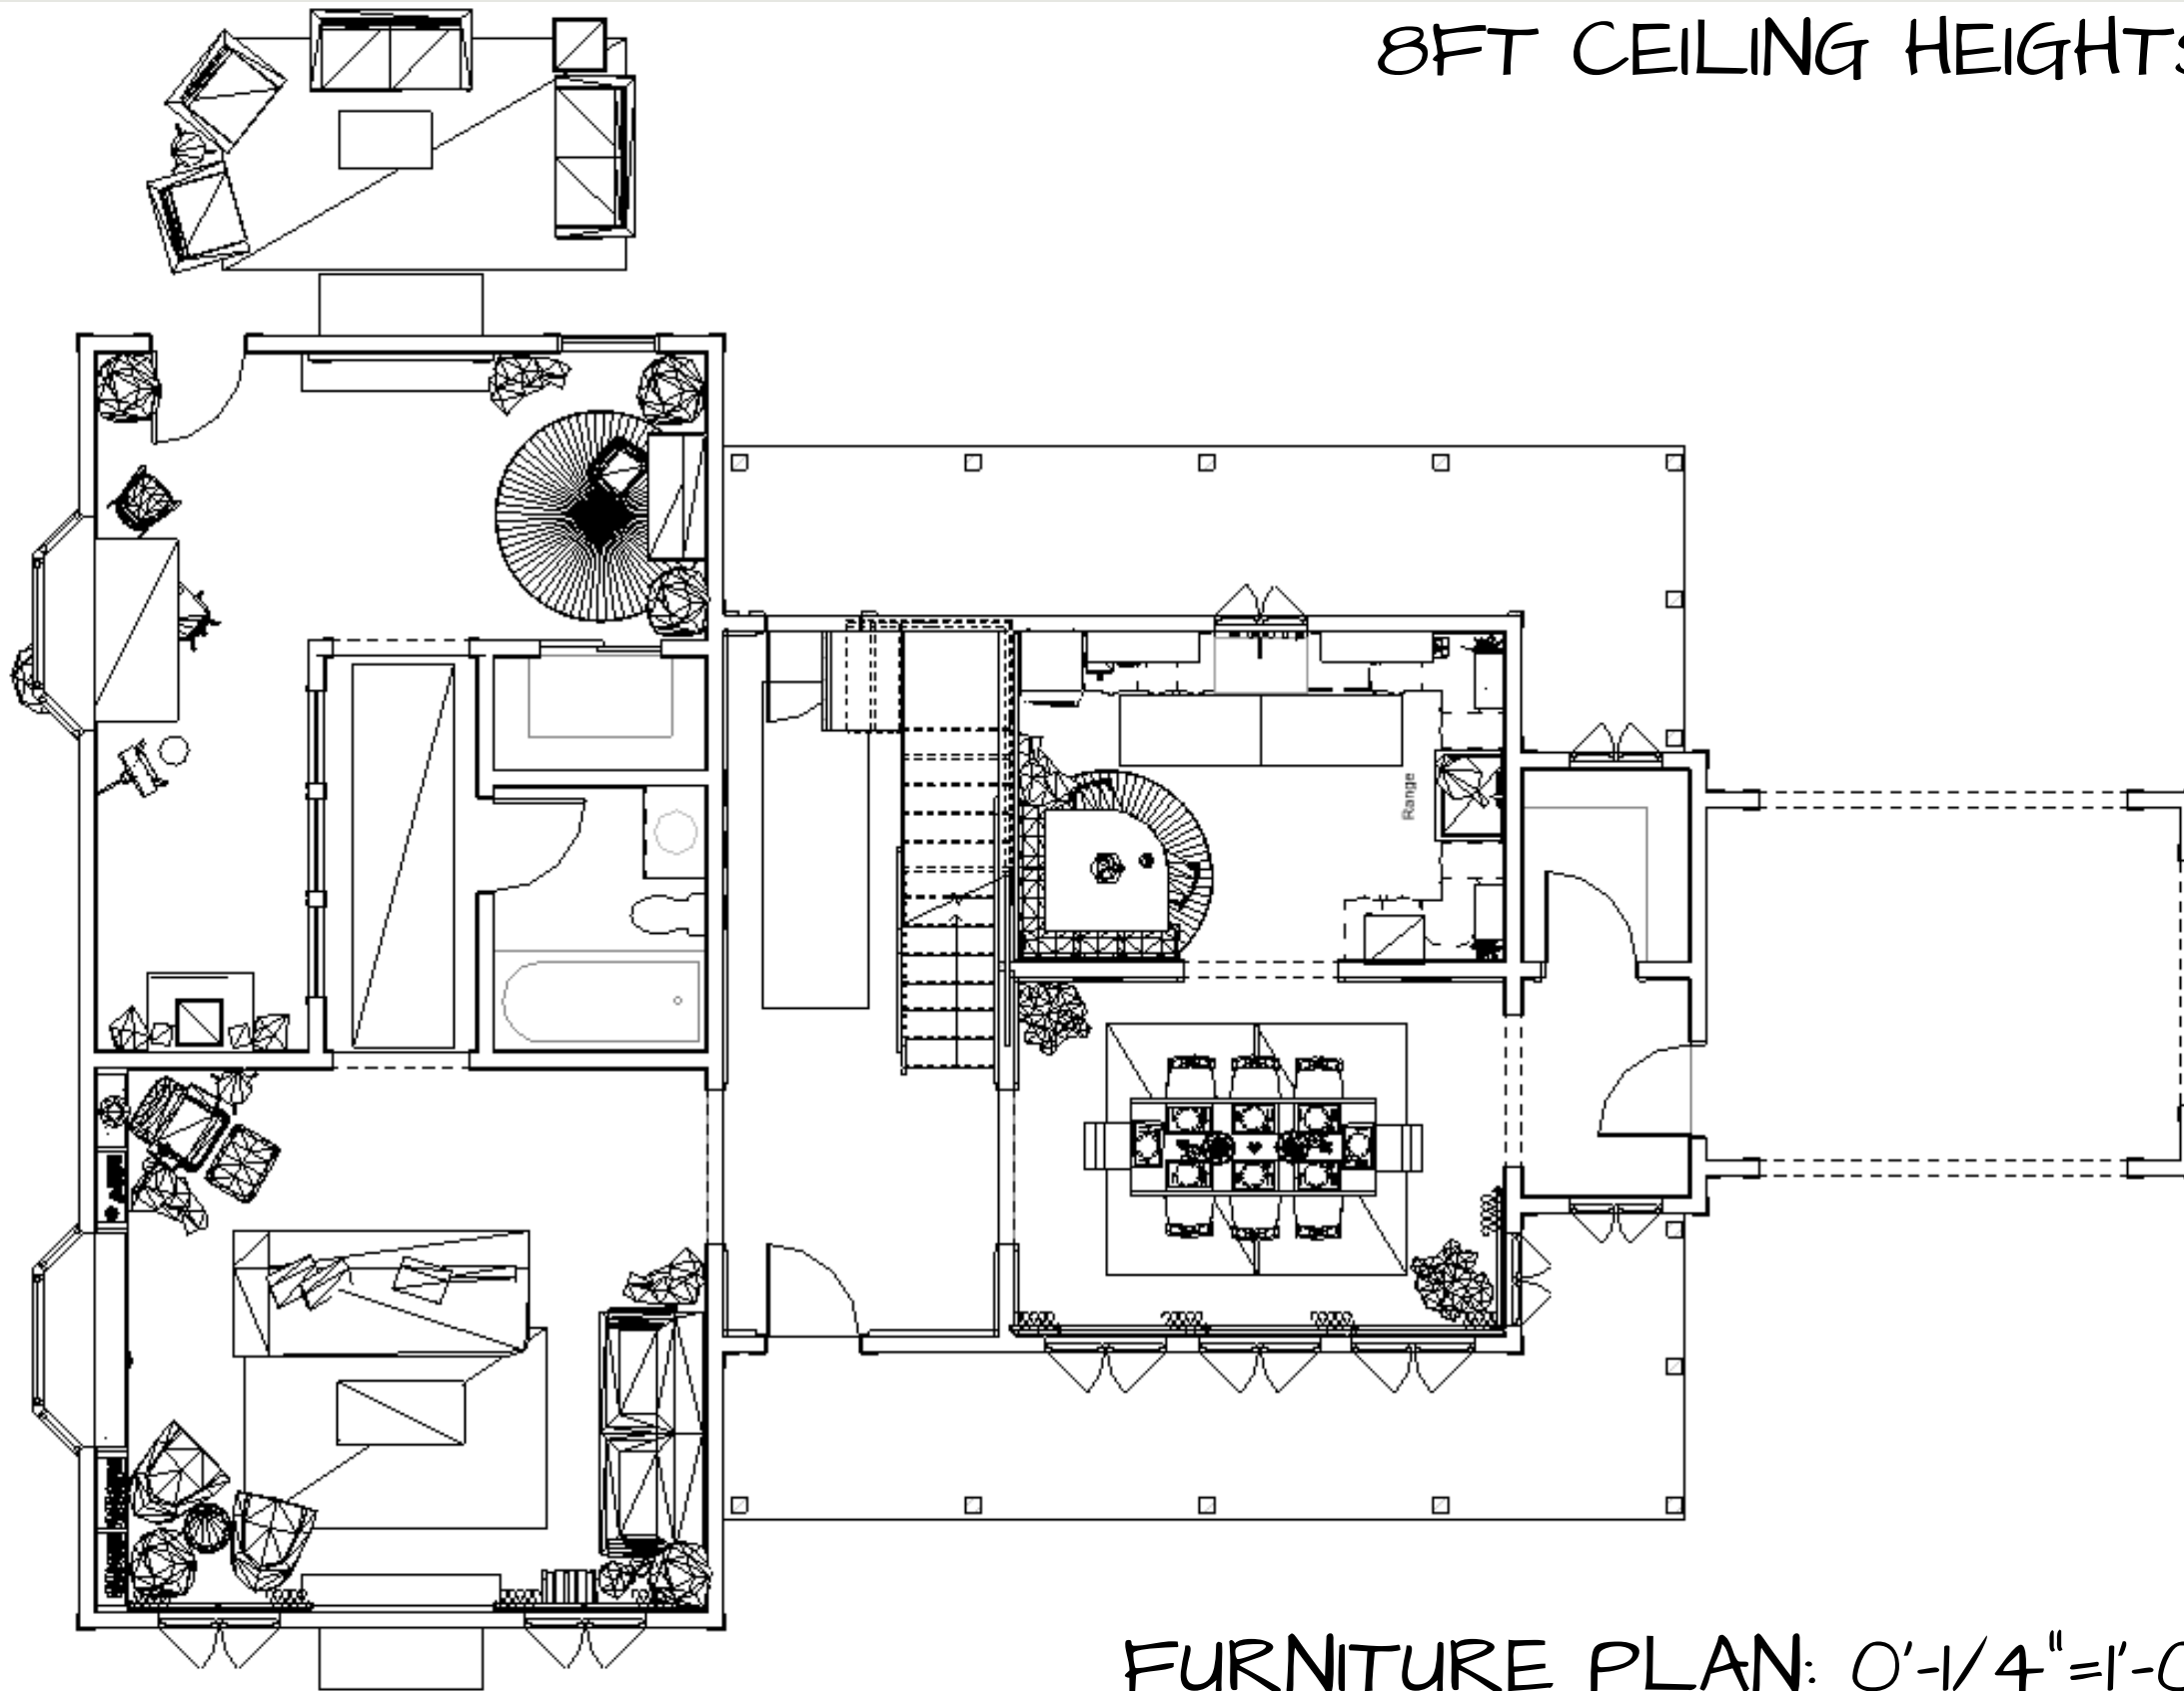

- Geothermal Heating & Cooling System
