The Goal: Raise Awareness

Radon is the leading cause of lung cancer among non-smokers and the second leading cause of lung cancer in the United States. The radioactive element moves through the ground to the surface, and can easily enter homes or buildings. There is no way to detect radon unless it is tested. This contest is designed to raise awareness for radon testing and inform people of the danger of radon in the home.

Open to all children ages 9 through 14
Submission Deadline: November 8, 2019

Poster Topics:
1. What is radon?
2. Where does radon come from?
3. How does radon get into our home?
4. Radon can cause lung cancer.
5. Test your home for radon.

Visit www.UGAradon.org for submission form
