## Care Management and Counseling

Our care managers are advocates for the well-being of aging clients and for the caregivers helping them. The goal is to seek solutions to improve the quality of life for seniors.

### Assessment and Evaluation

Care managers are available to meet with individuals and caregivers to evaluate, educate, and determine need for services. Seniors who meet program eligibility criteria are assigned to services as they become available.

### Benefits Explanation

Our staff can explain benefits and explore potential resources. We strive to promote community inclusion and understanding of options.

### Client-Directed Management

We educate our clients in self-management skills and empower them to direct their own care from a variety of service options.

### Individualized Caregiver Guidance

We help caregivers identify causes of their stress and offer guidance in order to lessen their burden.
