

UNIVERSITY OF
GEORGIA

College of Family and Consumer Sciences
Department of Foods and Nutrition

Seeking Full-Time Research Professional in Human Nutrition

Description: The University of Georgia, Department of Foods and Nutrition is recruiting a full-time Research Associate with a start date of July 2021. This is a 3-year position with the possibility of an extension.

Responsibilities: To assist in the administration and dissemination of research projects across the age spectrum with an emphasis on early childhood and adolescence. This is a shared position between the laboratories of Dr. Sina Gallo, Director of the [Child Diet and Health Disparities Laboratory](#), and Dr. Joseph Kindler, Director of the [Nutrition and Skeletal Health Laboratory](#). The incumbent will lead research projects with the two PIs. Responsibilities will include study coordination, data collection and management, maintaining ethics and safety approvals, purchasing supplies, management of lab staff and student trainees, facilitating team meetings, and preparing research grants, meeting abstracts, manuscripts, and presentations.

Qualifications: Requires at least a baccalaureate degree in the field. Please contact your Human Resources office for an evaluation of education/experience in lieu of the required minimum qualifications.

Knowledge, skills and/or abilities:

- Working knowledge of clinical research, preferably in the field of pediatrics.
- Working knowledge of diet assessment methods.
- Working knowledge of with body composition methods.
- Data management knowledge.
- Aptitude in student/staff supervision and management.
- Capable of working independently and being flexible with work responsibilities.
- Strong verbal and written communication skills.
- Working knowledge in scientific writing and grantsmanship.
- Ability to be detail oriented with strong organizational and time management skills.

Applications must be completed via the following:
