

College of Family and Consumer Sciences
Department of Human Development and Family Science

**Assistant Professor Opening: Lifespan Development
at the University of Georgia – <https://www.ugajobsearch.com/postings/226106>**

The Department of Human Development and Family Science (HDFS) at the University of Georgia is seeking applicants for a tenure-track Assistant Professor in Human Development and Family Science with a focus on Lifespan Development to begin August 2022. The department is hoping to hire an individual who will build on and complement existing departmental strengths and extend departmental expertise to a wider range of the lifespan, with a preferred focus on either a) infancy and early childhood or b) middle and older adulthood.

The successful candidate will collaborate and contribute to an established curriculum in HDFS at both graduate and undergraduate levels; develop and maintain a rigorous, nationally-recognized research program in developmental science using advanced analytical strategies; secure funding from external sources and publish in peer-reviewed scholarly outlets; and teach undergraduate and graduate courses in human development and/or research methods in HDFS.

Qualifications: Earned doctorate in HDFS or closely related area (e.g., psychology, sociology, public health, education, gerontology, etc.). Applicants should have a program of research and scholarship in developmental science and/or quantitative methods appropriate for appointment as an Assistant Professor, and contribute to one or more of the department's research areas [<https://www.fcs.uga.edu/hdfs>]. See [UGA's criteria for faculty appointment, promotion and tenure](#).

The successful candidate will show clear and convincing evidence of, or clear potential for, securing external research funding. Research can be focused on developmental processes throughout the life course or during either infancy/early childhood or middle/older adulthood. Within these developmental periods all aspects of development will be considered, including (but not limited to) socio-emotional, cognitive, and biological/health outcomes. Individuals with expertise in marginalized and/or underrepresented communities are especially encouraged to apply. In addition, competitive candidates will have a background that includes successful teaching at the undergraduate and/or graduate level. Ideally, the candidate would have the ability to teach graduate level courses in quantitative methods (e.g., multilevel modeling, structural equation modeling, longitudinal analysis). The successful candidate will demonstrate competencies in collaborating, fostering teamwork, and mentoring students in human development.

Our preference is for candidates with expertise in advanced quantitative methods for studying developmental processes. This includes modeling continuity and change across developmental stages and life events, as well as making connections between individual development and important social contexts (e.g., families, communities, and socio-cultural contexts).

Applications: Review of applications will begin immediately and continue until the position is filled. Full consideration will be given to applications received by November 21, 2021. Candidates should submit their application online via <https://www.ugajobsearch.com/postings/226106>. Required materials include a letter of interest, curriculum vita, statements of research and teaching interests, a diversity statement, up to three

preprints/reprints of representative publications, and contact information for three references. The diversity statement should describe one or more ways you will contribute to building an equitable, inclusive, and diverse learning environment in teaching, mentoring, research, and service. Direct additional questions about the position to Dr. Geoffrey Brown, Search Committee Chair, glbrown@uga.edu.

Related searches in HDFS: The Department of Human Development and Family Science is currently conducting an additional search for a tenure-track Assistant Professor with an emphasis in Contexts of Development. More information about this related search can be found at <https://www.ugajobsearch.com/postings/226092>. Individuals who are interested in being considered for both positions should submit application materials to both listings.

About HDFS at UGA: The Department of Human Development and Family Science provides leadership in the field via cutting edge research, pedagogy, and service. We are an interdisciplinary program focusing on individual, relationship, and family development within diverse ecological contexts. Faculty research interests include infancy and childhood, adolescence and young adulthood, adult development and aging, parenting and caregiving, interpersonal relationships, health and biobehavioral processes, diversity and culture, and contexts of human development. We have a vibrant program with over 481 undergraduate majors, 48 graduate students, and 20 faculty operating in a collegial and supportive environment. Faculty in the department collaborate with numerous programs and institutions across campus including the Owens Institute for Behavioral Research, Center for Family Research, Bio-Imaging Research Center, Institute on Human Development and Disability, Institute of Gerontology, McPhaul Child Development Center, and UGA Cooperative Extension. Additional information about the department may be found at: <https://www.fcs.uga.edu/hdfs>.

The University of Georgia, located in Athens, Georgia, is a Research I, land-grant and sea-grant university institution in the University System of Georgia. Founded in 1785, the University of Georgia is the largest and most comprehensive educational institution in the state. The campus and community of Athens offer many cultural and recreational opportunities. UGA has approximately 30,000 undergraduate students and has been ranked by U.S. News and World Report as one of the top 15 public institutions of higher education in the United States. Recently, UGA was ranked 15th by the Kiplinger Magazine in the list of the “100 Best Values in Public Colleges.” The Athens campus is approximately 60 miles from the Blue Ridge Mountains and 185 miles from the coast. Visit the University’s website at <http://www.uga.edu> for additional information.

Commitment to Diversity, Equity, and Inclusion: The Human Development and Family Science (HDFS) Department at the University of Georgia aims to promote social justice, disrupt systems of oppression and marginalization, and advocate for the well-being of diverse individuals and families through teaching, research, and outreach. This is central to promoting optimal individual and family development. The HDFS Department is committed to: diversifying our faculty, staff and student body; creating opportunities and venues for continued faculty, staff and student learning, accountability, and discussion about issues of diversity, equity, inclusion, and social justice; utilizing critical pedagogical practices in our curriculum that promote diversity, equity, inclusion, and social justice in undergraduate, graduate, and extension education; generating and disseminating socially relevant research and scholarship; engaging with diverse communities through culturally responsive, decolonizing service and outreach; creating a climate of social justice learning

UNIVERSITY OF
GEORGIA

within the HDFS community by examining and challenging institutional structural inequalities; and annually assessing our individual and collective progress toward these commitments.

Likewise, the College of Family and Consumer Sciences at the University of Georgia embrace a commitment to diversity by modeling for the state and nation a community of individuals and programs which seek to reduce prejudice, disparities, and discrimination and build a supportive environment for all (see <https://www.fcs.uga.edu/about/diversity> for more information). We welcome applicants who share this commitment. The University of Georgia is an Equal Opportunity/Affirmative Action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, gender identity, sexual orientation or protected veteran status. Persons needing accommodations or assistance with the accessibility of materials related to this search are encouraged to contact Central HR (hrweb@uga.edu). Please do not contact the department or search committee with such requests.
