Villa Bellariva

Designed by: Madaline Cox
Professor: Dr. Rich
Class: TXMI 5310
Date: April 21, 2026

Located in the heart of Boston, this boutique hotel reimagines Italian Revival style through the city's rich history and vibrant artistic culture. Drawing inspiration from Boston's legacy of craftsmanship, historic neighborhoods, and waves of Italian immigration, the design blends classical European elegance with a contemporary, playful spirit. Rich textiles, layered fabrics, and a warm, earthy color palette—featuring deep browns, soft neutrals, and sun-washed tones, serve as key storytelling elements. These selections are paired with thoughtfully curated finishes that draw from Italian history, bringing its artistry to life through subtle patterns, classical motifs, and symbolic references woven throughout the space.

Warm, timeless materials such as plaster, natural wood, marble, and stone ground the interiors, creating a sense of comfort and cohesion amid the expressive use of color and texture. Arched openings, columns, and artisanal finishes reference traditional Italian architecture, while modern furnishings ensure the space feels welcoming and livable. The overall effect is energetic yet refined, offering guests a rich, art-forward experience that honors Boston's past while embracing a fresh, expressive identity inspired by Italian design traditions.
