

Certainty to Cover a Sudden \$2000 Expense

Note: This graph represents individuals' certainty to pay off an unexpected expense of \$2000 during COVID-19. The difference between the mean percent of certain, probably, probably not, certainly not, do not know, will not say and quintile is statistically significant at the 5% level. This data is from waves 3 and 11 from the Coronavirus Tracking Survey of the Understanding America Study.
