2. Extension

4.1 Significant Extension Programs and Curricula - Major statewide programming; either series programs or a significant one-time effort (i.e. greater than 1 hour with complex implementation and/or collaboration with external organization).

4.1.1 National Diabetes Prevention Program. Administer the CDC recognized National Diabetes Prevention Program. Coordinate 14 lifestyle coaches across 16 counties to deliver to general community, workplace, and University System of Georgia Audiences. Applied for pending recognition in 2019 and achieved full recognition (highest status) in 2021. Thus, far, the program has graduated more than 100 participants who have lost more than 2,000 pounds.

Evaluation and Impact:

- Over 14 FACS Extension Agents trained
- Berg received DTTAC Master Trainer Select status in 2021
- Grant received to establish the program (\$145,000, President's Interdisciplinary Seed Grant)
- Grant from University System of Georgia (\$18,000) received to establish programs for UGA Faculty and Staff (programs have now extended to University of North Georgia)
- Maintain CDC registration status through biannual data submission and audit
- Two doctoral dissertations embedded in the startup project
- 18 cohorts implemented
- 178 participants educated (Distance learning: 64, In-person: 114)
- 1,497 pounds lost (Distance learning: 409, In-person: 1,088)
- Initial results suggest mean weight loss is 4.9% of initial body weight
- Achieved pending recognition status from the CDC Diabetes Prevention Program Recognition Program (CDC DPRP) in August 2019 for in-person programs
- Achieved full recognition (highest) status from CDC DPRP in April 2021 for in-person programs
- Achieved pending recognition status for from CDC DPRP in August 2020 for distance learning programs
- One manuscript submitted to the *Journal of Family and Consumer Sciences* (Wilson et al. 2021, under review)
- One manuscript submitted to the *Journal of the National Extension Association for Family and Consumer Sciences* (Rafie et. al, 2021, under review)
- Three manuscripts in preparation

4.1.2 Cooking for a Lifetime of Cancer Prevention Cooking School (C4L). Curricula to teach women without insurance (21 – 65 y) the American Cancer Society (ACS) nutrition and physical activity guidelines for cancer prevention and adult screening guidelines for breast, cervical, and colorectal cancer, and to connect eligible women with screenings through the Georgia Breast and Cervical Cancer Early Detection Program. Three hour workshop includes lecture with script for agent (73 slides), activities, handouts, cooking demonstration and tasting. Original author: C Crawley and O Jimenez. Significantly revised by A Berg and EL Selph (2016), and updated annually by A Berg and O Jimenez (2015-2018).

Evaluation and Impact:

- Over 30 FACS Extension Agents and 15 ACS Client Navigators trained
- 1466 Georgians reached since 2015
- Significant ($P < 0.001$) changes observed in cancer preventive behaviors
- One Extension training manual developed
- Four original fact sheets developed; 3 fact sheets revised; all available in English/Spanish
- Six state and national poster presentations and one published abstract
- Featured as a Showcase of Excellence (poster and oral presentation) at the National Extension Association of Family and Consumer Sciences in San Antonio, TX, 2018.
- Manuscript from graduate student thesis published (King et. al, *BMC Public Health*)
- Funding renewed annually (\$15,000 per year) and increased to \$25,000 in 2018-2019.
- Program lead to the development of a funded USDA grant (\$359k) to expand the program to men and women in rural Georgia and Texas. See *Cancer Prevention: Empowering Communities in the Rural South*

4.1.3 Cancer Prevention: Empowering communities in the Rural South. Adaptation of the *Cooking for a Lifetime of Cancer Prevention (C4L)* program for rural Georgia and Texas, to include males and females, to follow participants over time, and to conduct needs assessment for cancer prevention and preventative health insurance education nationally. Texas programs delivered by Prairie View A&M University (PVAMU) Extension. See grants section 2a. Includes adapted C4L workshop: lecture with script (78 slides), activities, handouts, cooking demonstration. Follow-up programs conducted 10 – 12 weeks post C4L program to evaluate behavior change over time. Sample follow-up program topics: prostate cancer prevention, health insurance for preventative care, and green cleaning.

Evaluation and Impact:

- 21 GA agents and the Health Coordinator at PVAMU trained
- PVAMU Health Coordinator trained 6 PVAMU FACS Extension Agents
- More than 1220 Georgians and 200 Texans attended the C4L program and 900 Georgians and 100 Texans attended follow-up programs
- Data collection ongoing; preliminary analyses suggest significant changes in intention to implement cancer preventive behaviors from pre- to post-program and maintenance at follow-up above baseline
- Preliminary analyses suggest program participants are more likely than non-participants to have had some, but not all, cancer screenings discussed in the program
- One training manual developed
- One peer-reviewed Extension bulletin published
- Four state and national poster presentations with one published abstract
- Three conference oral sessions (two national and one international)
- Two first author manuscripts in preparation

4.1.4 Confidence, Ownership, Reliability, and Exercise (CORE) Family Nutrition Program. Twelve-week program to improve nutrition and physical activity behavior among parents/guardians of overweight and obese Hispanic Adolescents. 10 educational lessons include interactive lecture, activities, handouts, and child snacks and tasting. Sample topics: Go Whole with Grains, Reducing Sugary Beverage Intake, Fats: knowing the types.

Evaluation and Impact

- Original curriculum developed including English and Spanish script by **Berg A**, Cawthon C (intern), Hollingsworth T (intern), and Everson D (FACS Extension faculty)

- Curriculum adapted for use with general Extension audiences as series or standalone sessions with evaluation. 50 FACS Extension agents trained
- Four cohorts of families educated by Berg and trained graduate students and interns
- Significant ($P < 0.05$) changes in weight management behaviors
- One national conference poster presentation with published abstract
- Two peer reviewed publications (Yli-Pippiari S et. al., 2017; Rivera-Gonzalez N et. al., 2019).

4.2 Extension Lesson Plans –Include scripted power point presentation, activities, handouts and evaluation. Several used for professional continuing education (i.e. child care providers, FACS teachers). Coauthors are graduate students, dietetic interns, or Extension agents (exception: Connie Crawley, MS, RD, former Extension specialist).
